

## Case Study: *Securing the African Cup Championship Games*

Government of Gabon Chooses RADWIN's PtP  
& PtMP Systems for Mission-Critical Video  
Surveillance Transmission

### Customer

Government of Gabon.

### Partner

Magal Security Systems Ltd.

### Customer Requirements

Secure the African Cup Championship Games.

### The Solution

RADWIN 5000 Point-to-Multipoint and RADWIN 2000 Point-to-Point wireless systems in the 3.5GHz and 5GHz bands were chosen to help secure the African Cup Championship Games.

RADWIN's Point-to-Multipoint and Point-to-Point systems relayed real-time HD video from cameras installed within the stadium, the Olympic Village and surrounding roads back to the central command center.

The high-quality footage enabled security personnel to monitor the safety and security of the athletes, visitors, dignitaries and media members who attended the games and rapidly detect and respond to unfolding events and potential threats.

*"RADWIN's wireless systems deliver video in real-time and with excellent quality. They ensured the safety of athletes and spectators during this major sports event."*

Eitan Livneh, President & CEO  
Magal Security Systems Ltd.

## The Results

RADWIN's wireless surveillance network enabled the government of Gabon to achieve the following results:

- » Ensure the security of athletes and visitors who attended the African Cup Championship Games
- » Keep the peace during a mega event which drew crowds in the hundreds of thousands
- » Monitor all areas from one control center and augment the reach of local police forces
- » Increase detection and response times via live video transmission

## About RADWIN

RADWIN is a leading provider of sub-6 GHz wireless Point-to-Point and Point-to-Multipoint solutions that deliver voice, video and data with unmatched high-capacity for long ranges. Deployed in over 150 countries, RADWIN's solutions power applications including backhaul, broadband access, private network connectivity, video surveillance transmission as well as wireless broadband in motion.

## Why RADWIN

- » Systems deliver actionable surveillance information with high image quality in real-time
- » Flexibility to deploy links in any area where surveillance is needed
- » Highest capacity for video streams, enabling positive identification of individuals
- » Fast set up times - Wireless eliminates the need to lay cable or dig trenches
- » Uninterrupted transmission, even in urban zones where there are obstructions to direct line-of-sight
- » Dedicated bandwidth per camera site with RADWIN 5000 PtMP
- » Extremely reliable & robust network - zero video "hiccups" or network downtime
